STEAM Steren

El proceso de aprendizaje requiere diferentes formas para generar en la mente un registro que ayude a solucionar problemas en la vida diaria. Y aprender jugando es la mejor manera para entender el mundo.

STEAM es una forma rápida de abreviar las palabras: Science (ciencia), Technology (tecnología), Engineering (ingeniería), Arts (artes) y Mathematics (matemáticas), disciplinas que son pilares de la educación y son fundamentales durante el desarrollo de los más pequeños.

Este producto **STEAM** de **Steren** se basa en la curiosidad nativa que yace en ti, así como en el deseo natural de crear, explorar e investigar el mundo para aprender de él. Con este camión 2 en 1, emplearás tu comprensión en los engranes y en el movimiento, además de desarrollar tu creatividad cuando implementes piezas adicionales para personalizarlo.

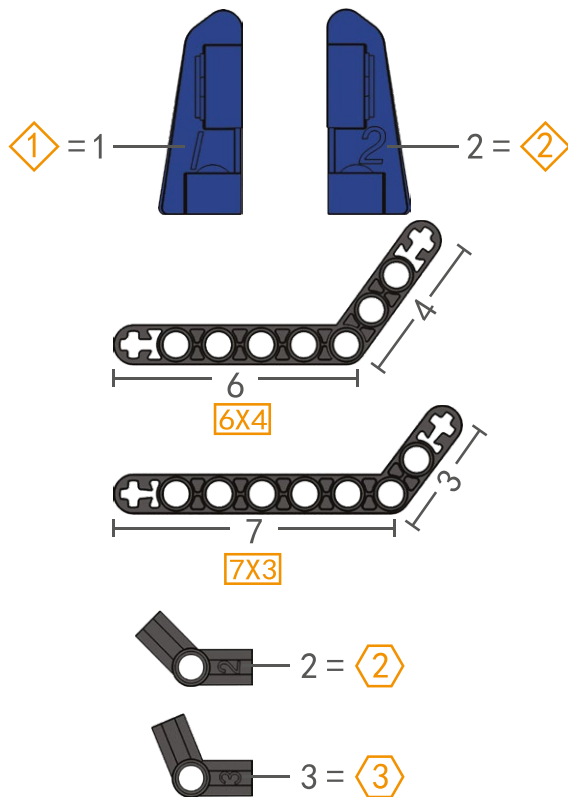

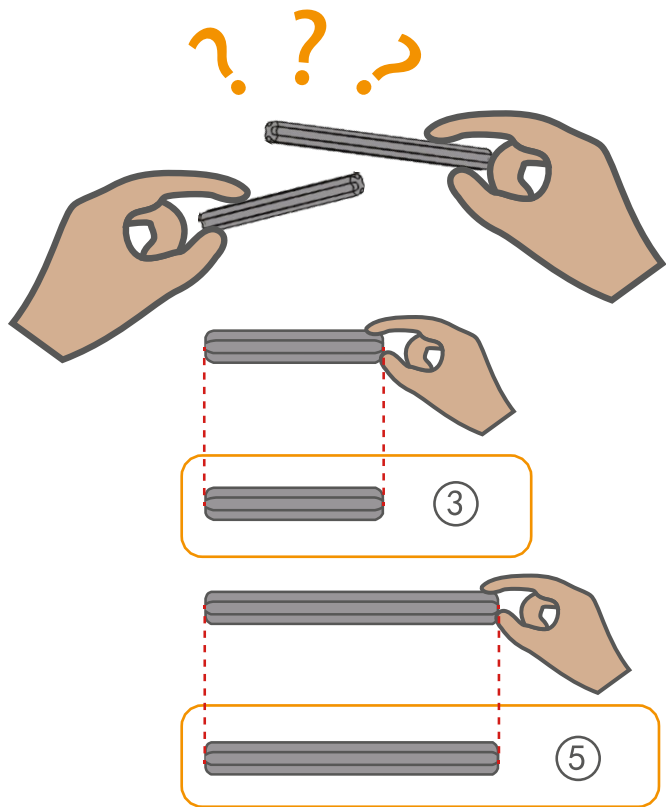

Tiene una caja principal que consta de partes mecánicas, y funciona esencialmente a partir de engranes, piñones y ejes que, al ser de diferentes medidas y estar correlacionados en diferentes puntos, logran generar el par de fuerza necesario para darle movimiento al eje principal.

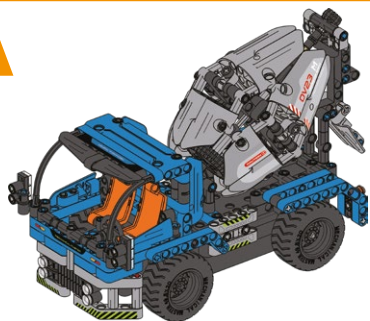

Por otra parte, los motores convierten la energía eléctrica proveniente de las pilas en energía mecánica. Esto debido al campo magnético en el estator que provoca movimiento de giro en el rotor.

El control es muy importante, y no nos referimos al control remoto, sino a la tarjeta de control que sirve tanto para recibir la señal RF como para enviar instrucciones de movimiento y dirección a los motores.

La caja de tracción puede ser usada como se sugiere en este manual, sin embargo, tú puedes hacer tus propias creaciones, usando solo la caja de tracción para aprovechar su movimiento y añadir piezas de LEGO®, ya que, gracias a su tipo de montaje, son compatibles.

Diviértete conociendo e investigando más a fondo, conforme armas y juegas con este fabuloso Kit camión 2 en 1 para armar.
